OBJECTIVE

Software Engineer with 2 years of experience in frontend development, skilled in React, Next.js, Redux, and TailwindCSS. Experienced in building scalable, user-friendly applications with strong focus on performance, SEO, and reusable components (ShadCN UI, custom hooks). Delivered 25% reduction in user friction at Edstellar and improved engagement in freelance projects. Also familiar with backend basics (Express.js, Ruby on Rails, APIs). Seeking a Frontend Engineer role to create high-quality, user-focused solutions.

EXPERIENCE

Frontend Developer

Sep 2023 – Apr 2024

Invensis Technologies Pvt. Ltd.

- Developed responsive, SEO-friendly pages using **Next.js, React, Tailwind CSS**.
- Built reusable components with **ShadCN UI** and validated forms using **Zod**.
- Followed clean code and modular architecture for high-performance, maintainable applications.
- Collaborated in agile sprints with design and backend teams.

Frontend Web Developer

Apr 2024 – Sep 2025

Edstellar Solutions Pvt Ltd

- Contributed to a **SaaS platform** for skills and assessment management with dashboards.
- Implemented **SSG, SSR, CSR** in Next.js and optimized performance with caching strategies.
- Developed **skill-management modules** with full CRUD and gap-analysis features.
- Used **React, Redux Toolkit, Tailwind CSS, and custom hooks** for modular, reusable code.

PROJECTS

University Student Management System | *Next.js, Firebase (Auth & Firestore), Tailwind CSS, React Hook Form*

- Built a full-stack web app for assignment submission and grading.
- Implemented role-based authentication with **Firebase Auth**.
- Managed real-time data storage using **Cloud Firestore**.
- Developed responsive UI with **Tailwind CSS** and reusable components.

College Academic Outcome Visualizer (Mobile App) | *React Native, Firebase (Auth & Firestore), Redux, React-Pie*

- Developed mobile app to visualize academic outcomes from Excel data.
- Implemented secure login and real-time updates with **Firebase Auth & Firestore**.
- Managed state with **Redux** and visualized data using **React-Pie**.
- Built mobile-first UI with navigation, custom menu, and native modals.
